PROFILE

Marketing professional who builds both the brand and the platform it runs on. Two years and eight months at Accenture built the analytical rigour: reading patterns in high-volume data, owning stakeholder reporting, and delivering under strict SLAs. Roles at Times OOH and Label Simran Anand applied that to live campaigns, content strategy, and market research. Now runs an independent engagement for AKS Architecture Studio, having designed and shipped its website, database, and custom CMS before taking ownership of its social channels. Trilingual in English, Hindi, and French, an advantage as French maisons expand across India and the Middle East. Publishes self-directed brand strategy case studies on Dior, Jacquemus, Nykaa, and Rhode. Open to roles across Delhi NCR and Mumbai, with Dubai on the horizon.

CORE SKILLS

STRATEGY	Brand positioning · Campaign strategy · Market entry · Competitor analysis · Audience segmentation

TOOLS	Google Analytics (GA4) · Meta Ads Manager · Google Ads · HubSpot · Salesforce CRM · Power BI · Advanced Excel · Canva · Figma · Notion
LANGUAGES	English · Hindi · French

EXPERIENCE

Freelance Marketing & Digital Consultant, AKS Architecture Studio Jul 2026 – Present
Architecture, construction & interior design practice · Panchkula & Mohali · aksarchitects.co

- Designed and shipped the studio's website end to end, owning information architecture, page copy, project presentation, and a responsive mobile-first build, and giving AKS its first owned digital presence independent of social platforms.
- Built a password-authenticated admin CMS on Supabase and Postgres, designing the relational content model across projects, project images, and upcoming renders, with direct image upload to object storage.
- Handed the studio's two principals full control to publish, reorder, and feature work themselves, removing the developer dependency for every content change.
- Own the studio's social media: content strategy, monthly content calendars, copy, and creative direction, built around a Reels-first approach to short-form video.
- Track site and channel performance, translating what the numbers show into the next month's content plan rather than reporting it after the fact.

Marketing & Brand Communications, Label Simran Anand (part-time) Oct 2025 – Mar 2026
Homegrown fashion label

- Worked directly with the label on campaign planning and brand communications, translating collection stories into campaign concepts for a couture and occasion-wear audience.
- Built social media strategy and content direction across seasonal content calendars, short-form video, and launch moments tied to each collection drop, and sharpened how the label positioned itself to a D2C audience.

Advanced Application Engineer Analyst, Accenture Nov 2023 – Jun 2026
SOC Analyst · Gurugram, Haryana · Hybrid, full-time · 2 yrs 8 mos

- Read patterns in large, high-volume datasets to separate signal from noise under time pressure, the analytical discipline that now drives how campaigns and audiences get read.
- Built and maintained dashboards and recurring reporting that turned complex performance data into clear, decision-ready summaries for senior and client-side stakeholders.
- Monitored, investigated, and resolved security incidents across enterprise client environments to strict SLAs in a 24/7 operations model, owning escalation and briefing non-technical stakeholders on complex findings.

Marketing Team Intern, Times OOH Feb 2023 – Jun 2023
Out-of-home advertising · 5 months

- Pitched outdoor poster and OOH campaign concepts into live client briefs, contributing creative ideas alongside the core marketing team.
- Conducted market research and tracked emerging trends across new and developing markets, turning that intelligence into campaign strategy input.
- Supported campaign execution, built client-facing pitch presentations, and analysed post-campaign performance to strengthen brand visibility across sites and formats.

EDUCATION

Thapar Institute of Engineering & Technology · B.Tech, Electronics and Instrumentation 2019 – 2023
Granted patent (co-inventor): "A System of Non-Invasive Diagnosis for Diabetes and Dyspepsia Detection using ECG Signal", developed as an undergraduate research project. CGPA 7.25.
